

Unlocking Innovation in Energy Industry

Empower Your Operations with Top-tier IT Talent from Pantheon

Pantheon brings over 25 years of experience to the forefront, specializing in delivering exceptional software engineering workforce solutions for the Oil & Gas, Energy, and Renewable industry. Our tailored workforce solutions are designed to elevate your digital capabilities, drive innovation, and ensure seamless operations.

Services Overview:

IT Workforce Solutions:

- We provide highly skilled and proficient IT professionals who specialize in the Energy industry. Our extensive network of talent allows us to source candidates with expertise in areas such as software development, data analytics, cybersecurity, infrastructure management, and more.
- We help our clients to quickly scale their software engineering teams with our qualified professionals by providing rapid access to specialized skills in cutting edge technologies

Software Engineering Services:

- We offer turnkey/fixed price software development services for various business units within the Energy industry. Our experienced team can develop customized software solutions to meet specific requirements, ensuring high quality and timely delivery.

Managed Services:

- Offload the burden of IT management with our end-to-end managed services and ensure optimal performance, security, and compliance without the overhead.
- Proactive IT Support: Ensuring the reliability and security of your IT infrastructure with scalable solutions that adapt to the evolving needs of your business.

Team as a Service:

- Our Team as a Service (TaaS) model allows energy companies to scale their IT resources as needed. We provide flexible staffing options, allowing organizations to quickly ramp up or down based on project demands and business requirements.
- Experience the flexibility of a dedicated IT team aligned with your project needs and work seamlessly with experts who understand the intricacies of the energy industry.

SAP Services:

- Leverage our expertise in SAP solutions to streamline your business processes, Implement, customize, and optimize SAP applications for enhanced efficiency.
- Project-Based Staffing: Expert consultants for your project's success. Our project-based SAP staffing ensures you have the right expertise for specific tasks

Why Choose Pantheon

Long-standing partnerships: We have been working with leading energy companies for over 25 years. This long-standing relationship demonstrates our deep understanding of the industry and our ability to deliver exceptional results.

Global presence: With offices in multiple countries, including Singapore, Malaysia, Thailand, India, Hungary, Brazil, Argentina, Canada, and the USA, we have a global footprint that allows us to serve energy clients around the world.

Wide range of services: We offer a comprehensive suite of services tailored to the energy industry, including IT staffing, Managed services, software development, support services, and more. Our diverse portfolio enables us to address various needs and challenges faced by energy companies.

Proven track record: We have successfully executed numerous projects for energy clients, ranging from large-scale ERP implementations to application portfolio management programs. Our track record of delivering high-quality solutions on time and within budget sets us apart from our competitors.

Subject matter experts: Our team includes industry experts who possess in-depth knowledge of the energy sector. They understand the unique requirements, regulations, and challenges faced by energy companies and can provide valuable insights and guidance.

Adherence to best practices: We follow industry best practices and standards to ensure that our solutions meet the highest quality and security standards. Our commitment to excellence and continuous improvement sets us apart in the energy industry.
